

(ii) The organization or subdivision, itself, operates the land; and

(iii) No part of the net earnings of the organization or subdivision accrues to the benefit of any private shareholder or individual.

(2) If Reclamation determines that a religious or charitable organization or any of its subdivisions does not meet the criteria listed in paragraph (b)(1) of this section, then:

(i) If the central organization has not met the criteria, Reclamation will treat the entire organization, including all subdivisions, as a single entity; or

(ii) If a subdivision has not met the criteria, only that subdivision and any subdivisions of it will be treated as a single entity and not the central organization or other subdivisions of the central organization; and

(iii) In order to ascertain the acreage limitation status, Reclamation determines the total number of members in both the organization that has not met the criteria and in any subdivisions that are under that organization. If Reclamation determines that total number equals:

(A) More than 25 members, then Reclamation treats that organization and every subdivision under that organization as a single legal entity with a limited recipient status; or

(B) 25 members or less, then Reclamation treats that organization and every subdivision under that organization as a single legal entity with a qualified recipient status.

(c) *Acreage limitation status of prior law religious or charitable organizations or subdivisions.* (1) Religious or charitable organizations and each of their subdivisions are treated as separate prior law corporations, if neither the district nor that religious or charitable organization or its subdivisions elect to conform to the discretionary provisions.

(2) Reclamation will treat the entire organization, including all subdivisions, as a single prior law corporation, if the central organization or any subdivisions do not meet the criteria specified in paragraph (b)(1) of this section.

(d) *Affiliated farm management between a religious or charitable organization and a more central organization of the same affiliation.* Reclamation permits a sub-

division of a religious or charitable organization to retain its status as an individual entity while cooperating with a more central organization of the same affiliation in farm operation and management. Reclamation permits affiliated farm management regardless of whether the subdivision is the owner of the land being operated.

§ 426.10 Public entities.

(a) *Application of the acreage limitation provisions to public entities.* Reclamation does not subject public entities to the acreage limitation provisions of Federal reclamation law with respect to land that Reclamation determines public entities farm primarily for nonrevenue producing functions. However, public entities are required to meet certification and reporting requirements as specified in § 426.18.

(b) *Sale of public land.* Reclamation does not require public entities to seek price approval before they sell non-exempt lands. Once sold, Reclamation can make irrigation water available to such land if the purchaser meets RRA eligibility requirements.

(c) *Leasing of public land.* Public entities can lease irrigation land that they own or control to eligible landholders. Land leased from a public entity counts towards the lessee's ownership and nonfull-cost entitlement.

§ 426.11 Class 1 equivalency.

(a) *General application.* Class 1 equivalency determinations will establish, on a district-wide basis, the acreage of land with lower productive potential (Classes 2, 3, and 4) that would be equivalent in productive potential to the most suitable land (Class 1) in the local agricultural economic setting.

(1) Reclamation establishes equivalency factors by comparing the weighted average farm size required to produce a given level of income on each of the lower classes of land with the farm size required to produce that income level on Class 1 land.

(2) For equivalency purposes, Reclamation will classify all irrigable land as Class 1, 2, or 3; no other classifications are permissible for irrigable land. Class 4 and special-use land classes will be allocated to one of these three classes on a case-by-case basis.
